	relates to <u>ST3DD-38</u> The visual feedback for invalid crede	In Progress

# Description

### Description:

Verify that the system provides clear visual cues to indicate unsuccessful login attempts due to invalid credentials.

### Steps:

Launch the Carrefour e-commerce app or access the login page on the website.

Access the login form. Locate the email address and password fields.

Enter an invalid email address in the email address field. This could be a non-existent email address, an address with typos, or an address not associated with a registered account.

Enter an invalid password in the password field.

Submit the login form.

Expected Result

The system should display an error message near the email address and the password fields.

The message should clearly state that the entered email address is invalid or not found and that that the password is incorrect.

### Pass/Fail Criteria:

Pass if the system displays clear and specific error messages near the respective fields (email or password) for both invalid email and invalid password scenarios. Additionally, visual cues like color changes in the input fields should be present to indicate errors.

Fail if the system doesn't display error messages or the messages are unclear and don't pinpoint the invalid field (email or password).

[ST3DD-35] Verify the presence and functionality of a "Remember Me" checkbox on the login form - GUI testing Created: 19/Apr/24 Updated: 27/May/24 Resolved: 19/Apr/24

Status: Done

# Description

Description:

Verify the presence and functionality of a "Remember Me" checkbox on the login form.

Steps to Reproduce:

Launch the Carrefour e-commerce app (or access the login page on the website). Access the login form.

Enter a valid email address and password for a registered account.

Select the "Remember Me" checkbox (if applicable).

Submit the login form.

Close the app or browser window (log out).

Re-launch the app or revisit the website.

### Expected Result:

User should be able to see the "Remember Me" checkbox inside the login form. Selecting the "Remember Me" checkbox should maintain the user's login state across sessions. Upon relaunching the app or revisiting the website, the user should remain logged in and avoid needing to re-enter credentials.

### Pass/Fail Criteria:

Pass if the "Remember Me" checkbox exists and functions as expected, toggling login persistence across sessions with clear visual indication (e.g., checked/unchecked). Fail if the checkbox is missing, doesn't function properly or lacks visual indication of its state.

[ST3DD-34] Verify that the login form displays the email address and password fields with clear labels - GUI testing Created: 19/Apr/24 Updated: 27/May/24 Resolved:

Reporter:	IT Factory	Assignee:	Unassigned
<b>Resolution:</b>	Done	Votes:	0
Labels:	ST3DD		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

### Description

### Description:

Verify that the login form on carrefour.ro displays clear labels for the email address and password fields.

### Test Steps:

Verify Email Address Field Label:

Look for the field where users enter their email address for login.

Check if there is a label associated with this field.

Expected Result: The label should clearly indicate " "Email Address" or a similar translation in the user's language.

### Verify Password Field Label:

Locate the field where users enter their password for login.

Check if there is a label associated with this field.

Expected Result: The label should clearly indicate "Password" or a similar translation in the user's language.

Pass/Fail Criteria:

Pass: Both the email address and password fields have clear and unambiguous labels as described.

Fail: One or both fields lack clear labels or the labels are misleading or not easily understandable.

# [ST3DD-32] Verify the presence and functionality of a "Confirm Password"

field - GUI testing Created: 12/Apr/24 Updated: 27/May/24

Status: In Progress

# Description

Description:

Verify the presence and functionality of the "Confirm Password" field.

Steps:

- 1.Launch the Carrefour e-commerce app.
- 2.Access the register form.

- 3.Go to the "Confirm Password" field.
- 4.Enter the password in "Confirm Password" field.

### Expected Result:

Entering the same password in both the password and confirm password fields allows form submission. Entering different passwords results in an error message.

### Pass/Fail Criteria:

Pass if the system validates matching passwords and rejects forms with mismatched passwords with a clear error message.

Fail if the system accepts mismatched passwords or doesn't display an error message.

# [ST3DD-31] Verify the presence and functionality of a "Show Password" option for the password field - GUI testing. Created: 12/Apr/24 Updated: 27/May/24

# Description

### Description:

Verify the presence and functionality of a "Show Password" option for the password field (if applicable).

### Steps:

- 1. Launch the Carrefour e-commerce app.
- 2. Access the register form.
- 3. Go to the "Show Password" option
- 4. Click on "Show Password" option

# Expected Result:

Clicking "Show Password" reveals the characters entered in the password field. Unchecking it hides the characters again.

### Pass/Fail Criteria:

Pass if the "Show Password" option is present, functional and clearly indicates the password state (visible/hidden).

Fail if the option is missing, doesn't function properly or lacks indication of password visibility.

[ST3DD-30] Verify all required fields are present on the registration form and have clear labels - GUI testing. Created: 12/Apr/24 Updated: 27/May/24

# Description

### Description:

Verify the system's behavior if a maximum character limit exists for name and surname fields (not all systems have this).

### Steps:

Launch the Carrefour e-commerce app or access the registration page on the website.

Enter a valid, unused email address.

Enter a name or surname exceeding the maximum allowed character limit

Enter a surname exceeding the maximum allowed character limit. Submit the registration form.

Expected Result (depends on implementation):

The system displays an error message indicating the name or surname exceeds the maximum character limit.

### Pass/Fail Criteria:

Pass: If the system rejects registration with names/surnames exceeding the limit and provides a clear error message specifying the character limit.

Fail: If the system allows registration doesn't inform the user about exceeding the character limit.

# [ST3DD-26] Test registration with name/surname below minimum characters

	tests	ST3DD-4	As a registered user, I want to be ab	In Progress

# Description

### Description:

Verify the system rejects registration attempts with names/surnames shorter than the minimum allowed character count.

### Steps:

Launch the Carrefour e-commerce app or access the registration page on the website.

Enter a valid, unused email address.

Enter a name with fewer characters than the minimum requirement (e.g., 1 character).

Enter a surname with fewer characters than the minimum requirement (e.g., 1 character). Enter a strong password meeting complexity requirements.

Submit the registration form.

### Expected Result:

The system rejects the registration attempt.

An error message is displayed indicating the name or surname field requires a minimum number of characters (specify the number in the message).

### Pass/Fail Criteria:

Pass if the system rejects registration with names/surnames below the minimum and displays a clear error message specifying the character requirement.

Fail if the system allows registration with insufficient characters or the error message is unclear.

# [ST3DD-24] Test registration with password containing special characters

Created: 12/Apr/24 Updated: 27/May/24

Status: In Progress
Project: Dana Diaconu ST3

Project: <u>Dana Diaconu</u>

# Description

### Description:

Verify the system allows registration with a password containing a variety of special characters.

### Steps:

Launch the Carrefour e-commerce app or access the registration page on the website. Enter a valid, unused email address.

Enter a strong password meeting complexity requirements, including a combination of uppercase and lowercase letters, numbers, and special characters (e.g., "!@#\$%^&\*()\_+-=[]{};':|,.<>/?).

Submit the registration form.

# Expected Result:

The system successfully registers the user.

A confirmation message or success screen is displayed.

### Pass/Fail Criteria:

Pass if the user registers successfully with a password containing special characters and receives a confirmation (if applicable).

Fail if the system rejects registration due to special characters or doesn't meet the expected outcome.
